1. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.

2. Authorization for this Examiner's Amendment was given in a telephone interview with Mr. Robert A. Kalinsky on November 02, 2005.

3. Amend claims 8, 16, and 18-21 as stated below:

--

8. (Currently Amended) A computer program data product containing computer readable medium readable by a computing system and encoding instructions for a method for activating a requested processing component initiated by a calling component within a local computing system having one or more applications, the method comprising:

activating an instance of an application associated with one or more processing components;

receiving a request from a calling component to activate one of the processing components associated with the application;

determining an identity of the requested processing component, including an identity of a class ID and an identity of a partition from the request to activate the requested component initiated by the calling component;

obtaining configuration data for the requested component, the configuration data comprising an indication of public-private status for the requested component;

if the configuration data indicates that the requested component is a public component, activating an instance of the requested component;

if the configuration data indicates that the requested component is a private component, performing the following:

determining if the requested component is a member of the application that also includes the calling component as a member; and

if the requested component and the calling component are members of the same application, activating an instance of the requested component.

16. (Currently Amended) A computing system for activating a requested processing component initiated by a calling component within a local computing system having one or more applications, the computing system comprising:

an activated application associated with one or more processing components;

an activation control module for receiving a request to activate ~~a component one of the processing components~~ associated with the application, the request being initiated by a calling component and activating an instance of the requested component;

an application identity module for determining an identity of one or more applications used to identify the requested processing component; and

a permit object activation module for determining whether an instance of the requested component ~~may~~ can be activated, the permit object activation module using

Art Unit: 2141

configuration data including a value of a public/private property to determine whether the request component may can be activated, wherein the permit object activation module is programmed to:

if the configuration data indicates that the requested component is a public component, the permit object activation module allows activation of an instance of the requested component;

if the configuration data indicates that the requested component is a private component:

the permit object activation module determines if the requested component is a member of the application that also includes the calling component as a member; and

if the requested component and the calling component are members of the same application, the permit object activation module allows activation of an instance of the requested component.
